VITTEY TOKEN

PROJECT: Vitteey token

Launch date: February 4, 2022

Country of origin: Turkey

GENERAL PROJECT OVERVIEW

Launched on February 4, 2022, on Binance Smart Chain (BEP-20) by a team based in Turkey, VITTEY (VITY, finance in Hindi) is a project token aimed at both cheap and easy money transfer.

One of the main purposes of this project is to provide services on its own swap exchange, which will not charge a certain transaction fee even for a small amount of trading transfers without a minimum transaction limit.

In addition, in order to protect the investors from sudden price fluctuations, there is a well-designed auto-staking system that provides passive returns by rewarding token holders with fees from trading transactions (buying and selling) performed on VITY.

AIMS

- To develop its own blockchain and make it available for free.
- To enable you to do money transactions without paying a penny.
- To set the minimum transaction amount as 0.01cent.

For example, you can make your payment anywhere in the world within 2 minutes with a 10 dollar transaction fee with ETH. You can do this in the same way with TRX with a 1 dollar transaction fee. But with VITTEY, we aim to enable you to do these transactions without paying a penny. In addition to high transaction fees, there is a minimum transaction limit of 20 dollars for paying with ETH and 10 dollars for paying with TRX. Again, as a solution to this, VITTEY will set the minimum transaction amount as 0.01cent. Thus, using VITTEY as a payment tool will be both easy and affordable. For example, if you need to pay 6 TRY for a cup of tea and you want to pay it with TRX, you will have to pay a minimum of 150 TRY, on top of which you will pay the equivalent processing fee for twice the price of the tea. By scanning the QR code, you will be able to pay 6 TRY as 6 TRY, including the transaction fees. This is simply our goal and our project.
